

LifeArc

Supporting charities

We help fellow charities progress their
medical research to patients.

lifearc.org

Shared values and joint opportunities

LifeArc is an independent medical research charity that helps patients get the best treatments that science can offer through the development of medicines, diagnostics and treatments. Working together (often at no cost), your discoveries are more likely to end up reaching and impacting patients.

We bring a 25-year track record and a highly experienced team of experts who can partner with you to ensure your investment creates as much patient impact as possible as well as the financial returns that can fund even more future treatments.

A unique solution

Our approach is flexible and based on meeting your organisations' needs, not just offering a menu of services. We can offer you a comprehensive range of technology transfer and scientific support to help progress your research. We work with you to find and develop initiatives that will deliver real impact from your work.

To discuss your charity's needs please contact Madhu Madhusudhan.

Existing assets

You may already be sitting on a research portfolio that has huge potential. Other organisations may also have existing science you could use utilise.

We can discuss how we can work together to identify potential in existing science and look at funding opportunities to kick start it.

ACT NOW

We realise not all charities have the power, funds or means to invest alone. So we create initiatives (Accelerating Critical Treatments - Now) to bring together funders and supporters around specific disease areas, such as #kidscanceractnow, to help accelerate promising medical research into viable patient treatments.

Targeting your research funding

Investing in early stage research is a very risky business. We help you to evaluate and identify where best to allocate your research investment to ensure you are funding science with the best potential.

Turning your research into treatments

Your research may be ready for commercialisation. We can make sure it is partnered in such a way as to benefit your patients and your future research. With our extensive network of biotech and pharma partners we can help connect you with industry to move your research towards clinical trials and the patient, whilst protecting your investment.

We can help ensure your intellectual property is protected and can negotiate payment deals.

As a project progresses through clinical trials to the market, milestones & royalties can be generated reflecting the value of the original science.

We are the bridge between great science and greater patient impact.

LifeArc is the new name for MRC Technology, a medical research charity with over 25 years experience in helping scientists and organisations turn their research into effective therapeutics and diagnostics.

Our new name reflects our purpose. To be the arc or bridge between research and improving patients' lives.

Our mission is to pioneer new ways to turn great science into greater patient impact.

We are a charity

LifeArc is: registered with the Charity Commission for England and Wales no. 1015243; a charity registered in Scotland with the Office of the Scottish Charity Regulator no. SC037861; a company limited by guarantee no. 2698321 incorporated in England and Wales.

Registered Office:
7th Floor, Lynton House
7-12 Tavistock Square
London WC1H 9LT
United Kingdom
